

Mainframe Development II

A4

In this assignment, you will implement and deploy the BMS map shown below along with the CICS application that will provide the main MNU of your system.

Then make the required changes to the error messages and processing for the new transactions.

INSTRUCTIONS

1. Copy these datasets and the EMPTY member in these datasets from userid KC0**2597** to your userid KC0**3YYY** using ISPF

- a. KC02597.DCMAFD02.A4.MNU.JCL
 - i. MNUSBYYY
 - ii. UUMNUYYY
- b. KC02597.DCMAFD02.A4.MNU.COBOl
 - i. UUMNUYYY
- c. KC02597.DCMAFD02.A4.MNU.BMS
 - i. MNUSYYY
- d. KC02597.DCMAFD02.A4.MNU.PROCLIB
 - i. DFHZITCL

2. If it doesn't already exist, copy this dataset

KC03YYY.DCMAFD02.COBOl.LOADLIB

on userid KC0**2597** to your userid KC0**3YYY** using ISPF

- a. Choose the EMPTY member or any member present
(this member will not be used
and is required for the copy process)
- b. Only copy this if it is not present on your userid KC03YYY

3. Edit the files to replace the YYY to match your userid KC03YYY

4. Submit the MNUSBYYY.JCL to generate the BMS screens and correct any errors until Return code = 0

In ISPF use XDC, or

in Developer use Print to PDF to save entire job summary as

KC03YYY.DCMAFD02.A4.JOB.SUMMARY.BMS

5. Submit the UUMNUYYY.JCL to compile/LKED the COBOL program and correct any errors until Return code = 0

In ISPF use XDC, or

in Developer use Print to PDF to save entire job summary as

KC03YYY.DCMAFD02.A4.JOB.SUMMARY.MNU

6. On VISTA TN3270 emulator,

a. Enter CICS command to connect to CICS

b. Enter CICS commands

to setup your new mapset, program, and transaction

i. CEDA DEFINE MAPSET(MNUSYYY) GROUP(DCMAFD02)

ii. CEDA DEFINE PROGRAM(UUMNUYYY)
GROUP(DCMAFD02) TRANSID(9YYY)

iii. CEDA DEFINE TRANSACTION(9YYY)
GROUP(DCMAFD02) PROGRAM(UUMNUYYY)

iv. CEDA DISPLAY

1. GROUP DCMAFD02

2. ALL *YYY*

a. INSTALL of PROG, MAPSET, TRANS

v. CECI SEND MAP(MNUMYYY) MAPSET(MNUSYYY)

vi. CEMT SET PROG(UUMNUYYY) NEWCOPY

c. Test 9YYY with CICS to ensure MNU is displayed
and message for Choice 1 is 'CHOICE 1 IS NOT AVAILABLE'
and message for Choice 9 is 'APPLICATION ENDING'

7. On Developer, or ISPF

a. Edit UUMNUYYY.cbl

- i. to add messages for each choice 1, 2, 3, 4
for 1 use 'Choice 1 is not available'
for 2 use 'Choice 2 is not ready '
for 3 use 'Choice 3 is being tested '
for 4 use 'Choice 4 is not working '
- ii. to add error message when input is not 1, 2, 3, 4, 9
use 'Invalid input – KC03YYY'
where KC03YYY is your userid and
continue the application instead of ending the application

b. Enter required CICS commands to update your transaction 9YYY

c. Test 9YYY with CICS to ensure MNU is displayed, and correct errors display at correct times

Note: The MNU screen should look something like the sample below:

```
      M A I N      M E N U
=====

CHOICE 1 - ENTER NEW STUDENT

CHOICE 2 - INQUIRE BY STUDENT NUMBER

CHOICE 3 - CHANGE OR DELETE EXISTING STUDENT

CHOICE 4 - SEARCH BY STUDENT NAME

CHOICE 9 - EXIT THIS SCREEN

      CHOICE: X

MESSAGES YOUR PROGRAM SENDS WILL APPEAR HERE
```

Reminders:

1) The mainframe uses the EBCDIC character set, and Windows uses the ASCII character set. All files being submitted for marking must be in the ASCII character set.

You are required to check the files you are submitting to ensure they are in the ASCII character set on Windows.

The character set should be converted when a file is copied from the mainframe to Windows for an assignment submission. If you are having trouble getting files to convert properly then ask your professor for assistance to correct the settings for this conversion in your software.

EBCDIC files in submissions will not be marked, and this could impact a large portion of the marks for the assignment.

SUBMISSION REQUIREMENTS

For this assignment:

- Files created with XDC, or print to PDF:
KC03YYY.DCMAFD02.A4.JOB.SUMMARY.BMS
KC03YYY.DCMAFD02.A4.JOB.SUMMARY.MNU
- JCL, COBOL, PROCLIB files:

KC03YYY.DCMAFD02.A4.MNU.JCL	Member MNUSBYYY
KC03YYY.DCMAFD02.A4.MNU.JCL	Member UUMNUYYY
KC03YYY.DCMAFD02.A4.MNU.COBOL	Member UUMNUYYY
KC03YYY.DCMAFD02.A4.MNU.BMS	Member MNUSYYY
KC03YYY.DCMAFD02.A4.MNU.PROCLIB	Member DFHZITCL
- Screenshots showing the four messages and one error message that were added:
KC03YYY.DCMAFD02.A4.SCREENSHOT1.jpg
KC03YYY.DCMAFD02.A4.SCREENSHOT2.jpg
KC03YYY.DCMAFD02.A4.SCREENSHOT3.jpg
KC03YYY.DCMAFD02.A4.SCREENSHOT4.jpg
KC03YYY.DCMAFD02.A4.SCREENSHOT5.jpg
- Transfer the XDC dataset of these two job summaries into a folder on your PC,
or open each of these two job summaries in Developer
and use print to PDF to create files on your PC
- Zip these 12 files
and upload the zip file to DCCconnect assignment folder

MARKING

- 5 marks for each of the 12 files in the submission

Total 60/60 marks
